Professional Summary

Senior .NET Developer with 8+ years of professional experience designing, building, and maintaining web applications and APIs using C# and the .NET ecosystem. Proven track record delivering scalable services and improving system performance through clean architecture, automated testing, and CI/CD practices. Strong experience with ASP.NET Core, Entity Framework Core, SQL Server, and Azure cloud services. Comfortable working in Agile teams, mentoring junior developers, and translating business requirements into maintainable code and measurable outcomes.

Technical Skills

Languages: C#, SQL, TypeScript, JavaScript.

Frameworks / Libraries: .NET 6/7, ASP.NET Core, ASP.NET MVC, Entity Framework Core.

Web / Front-end: RESTful APIs, Web API, Razor, React (Advanced), HTML5, CSS3.

Databases: Microsoft SQL Server.

Cloud & DevOps: Azure (App Service, Functions, SQL Database), Docker, Azure DevOps, GitHub Actions.

Testing & QA: xUnit, NUnit, Moq, integration testing, Postman.

Tools: Git, Visual Studio, VS Code, Discord, Team.

Architecture: Microservices, Clean Architecture, CQRS basics.

Practices: CI/CD, automated deployments, code reviews

Work Experience

Senior .NET Developer | ASP.NET Core | React | REST APIs | Azure

LAM Sol | Dec 2022 – Till Now

- Developed and maintained core customer-facing microservices using .NET 6, ASP.NET Core Web API, and EF Core, supporting ~120k monthly active users.
- Led migration of a monolithic billing module to three microservices (billing, invoicing, payment) deployed in Azure AKS, resulting in 45% reduction in release cycle time and 30% improvement in system availability during billing peaks.
- Implemented Redis caching and optimized SQL queries, reducing average API response times from 520ms to 210ms (60% improvement) and cutting database CPU usage by ~28%.
- Increased automated unit and integration test coverage from 38% to 72%, reducing production bugs by 35% year-over-year.
- Implemented end-to-end CI/CD pipelines with Azure DevOps, enabling automated builds, tests, and blue/green deployments; reduced mean time to deploy (MTTD) from 2 days to under 2 hours.
- Mentored 2 junior developers, conducted code reviews, and introduced linting and static analysis (SonarQube) to improve code quality metrics

Full Stack .NET & React Developer | Azure | High-Performance APIs

The Next Bridge | March 2019 – Dec 2022

- Built RESTful APIs and internal tools using ASP.NET Core and SQL Server to support B2B integrations for retail clients, handling peak loads of up to 3,000 requests/min.
 - Designed and implemented a bulk data processing pipeline using Azure Functions and processing over 5M records/month with retry and dead-letter patterns; reduced manual processing time by 90%.
 - Developed and enhanced front-end features using React and Razor, collaborating closely with UI/UX teams to deliver scalable admin portal solutions, improving customer onboarding throughput by 22%.
 - Built reusable React components, managed application state, and integrated APIs efficiently to ensure smooth user experience and performance optimization.
 - Diagnosed and resolved performance bottlenecks in legacy SQL stored procedures, improving nightly ETL window by 65%.
-

Selected Projects:

Profile Management System

- **Role:** Full Stack Developer
 - **Tech:** ASP.NET Core, Identity Framework, SQL Server, React
 - **Impact:** Implemented secure authentication and role-based profile management; built scalable APIs and dynamic UI for seamless user data handling and integration with larger systems.
-

POS Management System

- **Role:** Full Stack Developer (Backend + Frontend)
 - **Tech:** .NET 6, ASP.NET Core Web API, EF Core, SQL Server, React, REST APIs
 - **Impact:** Built a scalable POS system handling sales, inventory, and billing workflows; implemented real-time transaction processing and reporting dashboards, improving operational efficiency and reducing manual workload.
-

Hospital Management System

- **Role:** Full Stack Developer
 - **Tech:** ASP.NET Core, Web API, SQL Server, React, Entity Framework Core
 - **Impact:** Developed modules for patient records, appointments, and billing; optimized data access for faster retrieval and improved coordination across departments, enhancing overall patient management efficiency
-

Attendance Management System

- **Role:** Backend-Focused Full Stack Developer
- **Tech:** .NET Core, ASP.NET Web API, SQL Server, React
- **Impact:** Automated attendance tracking with real-time reporting and analytics; reduced manual errors and improved accuracy through role-based access and structured data workflows.

Key Responsibilities & Achievements

- ✓ Designed, developed, and maintained **full-stack applications** using **ASP.NET Core, React.js, WinForms, and SQL Server** across desktop and web platforms
 - ✓ Developed and maintained **RESTful APIs** to support scalable and high-performance frontend and backend communication
 - ✓ Applied **Clean Architecture principles** to ensure separation of concerns, maintainability, and scalable code structure
 - ✓ Contributed to the design and implementation of **Microservices-based architecture**, improving system scalability and modularity
 - ✓ Built reusable and responsive UI components using **React.js**, improving user experience and development efficiency
 - ✓ Developed enterprise-level **desktop applications using WinForms**, enhancing business process automation
 - ✓ Designed and optimized **SQL Server databases**, including stored procedures, indexing, and query performance tuning
 - ✓ Integrated frontend and backend systems to ensure seamless data flow and real-time functionality
 - ✓ Participated in requirement analysis, system design, and solution architecture discussions with stakeholders
 - ✓ Improved application performance through debugging, profiling, and optimization techniques
 - ✓ Delivered multiple production-ready systems across **education, enterprise, and business domains**
-

Education

Bachelor in Computer Science Gomal University, D.I. Khan *Sept 2012 – May 2016*

Master. in Computer Science Gomal University, D.I. Khan *Sept 2016 – Dec 2018*
